RELIEF CARE

Most patients consult our office because they have an ache or a pain. Their goal? Relief. That's our first objective.

Diagnose is then agreed to better help the individual.

A thorough examination reveals areas of spinal dysfunction. Then, we offer a care plan designed to give you the best results in the shortest amount of time.

Visits are frequent during this period of intensive care. Each visit builds on the one before, so keep your appointments to get the best results.

Decision Time

As you make your choice, we're here to serve and help support you in your decision.

When you're feeling better, you'll have a decision to make. Will you continue with the care necessary to fully heal soft tissues? Or abandon the investment that you've made so far?

When you continue your care, visits are less frequent and progress will be less dramatic. If you end your care before fully healing muscles and soft tissues, you can invite a relapse.

Retraining supporting muscles

Improved biomechanics

Ligament strengthening

Doing and being your best

Wellness Care

Your health affects everything you do and everyone you know. With so many people depending on you, it makes sense to invest in your health.

A program of chiropractic checkups can help you be the caring parent, the loving spouse, the understanding friend or the dependable employee.

Invest in your health. You're worth it.
